What is MART?

- ❖ Your **MART** inhaler contains a quick acting, long lasting medicine to open your airways plus a preventer medicine to keep your lungs healthy.
- ❖ It should be taken regularly with extra puffs to treat symptoms such as wheeze or breathlessness.

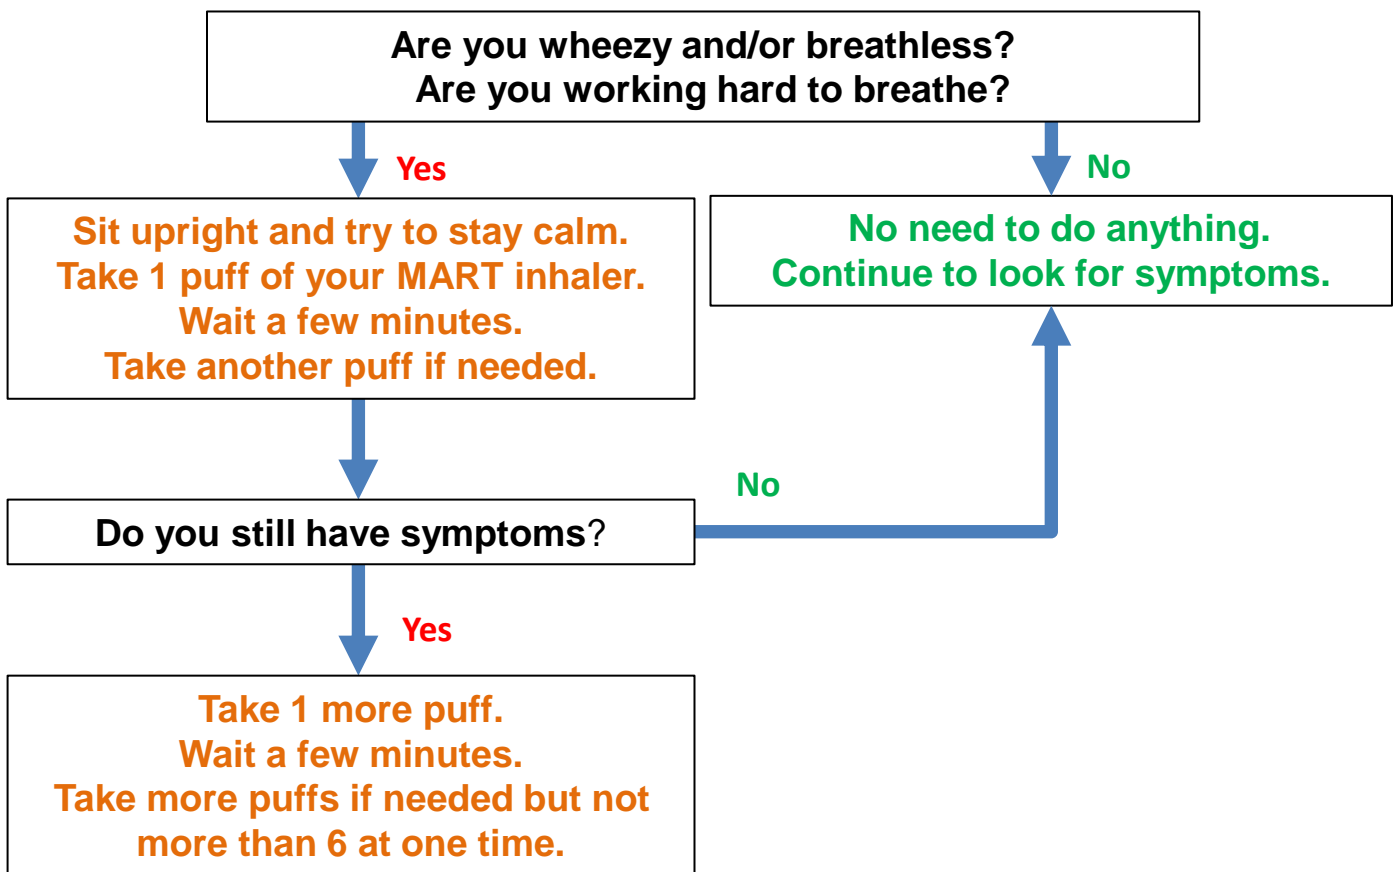

Your inhaler is
Morning dose inhalation(s)
Other medication

Strength (mcg)
Evening dose inhalation(s)

**Your maximum daily dose is 8 puffs. If 8 puffs is needed for 2-3 days seek medical advice.
Up to 12 puffs can be given in an emergency (see below).**

Treating Acute Asthma at home with MART

Call 999 or go straight to your local Emergency Department if you are not improving or need up to 12 puffs in 24 hours.
If you have a Salbutamol (blue) inhaler, give up to 10 puffs one at a time every few minutes using a spacer whilst awaiting urgent help.

ACTION PLAN: Maintenance And Reliever Therapy (MART) for Symbicort Turbohaler or DuoResp Spiromax inhaler

Asthma is under control if

- You have no symptoms during the day or night such as wheezing, shortness of breath, chest tightness or persistent dry cough
- You can do all your normal activities
- You do not need any additional doses of your inhaler

Contact your GP or Asthma Nurse for any of the following

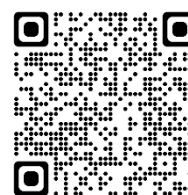

- You need your inhaler 3 or more times a week
- Your treatment has not been reviewed for more than 1 year
- You are wheezy after exercise
- You have a persistent night-time cough
